

Jorge Calderita

Pamplona, Spain · [linkedin.com/in/jcalderita](https://www.linkedin.com/in/jcalderita) · jcalderita.com · contacto@jcalderita.com

With over 20 years of software development experience, I led the development and subsequent migration of the IRATI web application at SALUD GN, enhancing its performance and scalability. I currently specialize in iOS and VisionOS development with Swift, both on the client and server side, incorporating accessibility best practices. I'm looking for new challenges in these emerging areas.

WORK EXPERIENCE

Bilbomatica (Salud Gobierno de Navarra)

Technical Lead

Pamplona, Spain

April 2010–May 2024

- Maintenance, development, analysis, and evolution of the Irati web application (“Nursing Care”).
- Migration from Visual Basic to C# under an MVC architecture, improving scalability and performance.
- Maintenance and migration of the SQL Server database, optimizing efficiency.
- Management and automation of deployments through continuous integration, ensuring fast and high-quality deliveries.
- Maintenance and evolution of the API to ensure efficient communication with other system products and services.

Wairbut - Infodesa - Duna (Caja de ahorros de Navarra)

Software Analyst

Pamplona, Spain

March 2005–April 2010

- Management and administration of the Oracle-based Datawarehouse environment.
- Planning and execution of Unix scripts with SQL instructions for table loading in Oracle.
- Optimization of process performance and continuous improvement of operational efficiency.
- Creation and development of new projects focused on the analysis and improvement of the informational environment.
- Resolution of technical incidents in the system, ensuring service stability and continuity.
- Maintenance of batch processes in Cobol on the host for data loading and unloading.
- Creation of customized reports for different departments, meeting the specific needs of each area.
